

## The MOMENT a hug feels even tighter.

You were made for this moment. The moment your kids get to spend quality time with “Mom” instead of a “cancer patient.” And it’s all made possible because UVA Cancer Center is also made for this moment. As Virginia’s Only Comprehensive Cancer Center as designated by the National Cancer Institute, UVA Cancer Center has specialists who work hand-in-hand with researchers to bring you the latest therapies and a personalized treatment plan. So you can keep bear hugging for many years to come.
