MRI SAFETY WEEK

a) True b) False 37 The patient and any personnel that accompanies the patient must wear hearing protection during an MRI exam. a) True b) False 48 There are 8 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False 59 If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False 60 The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physicial should never be used to answer the questions. a) True b) False 70 The patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician asys the implanted device block. b) False 80 The MRI magnet is always on. a) True b) False 81 The MRI magnet is always on. a) True b) False 92 Medication patches. EKG leads, pulse eximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the fisk of a bium. a) True b) False 10 If there is a fire in the MRI scan room, only an MRI-safe fire extinguisher can be used. a) True b) False 110 If there is a fire in the MRI scan room, only an MRI-safe fire extinguisher can be used. a) True b) False	1)	Safety procedures can be temporarily suspended if there is a life threatening emergency.
Metal objects can become dangerous projectiles in the MRI scan room and could cause serious injury or even death. a) True b) False The patient and any personnel that accompanies the patient must wear hearing protection during an MRI exam. a) True b) False There are 6 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False There are 6 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False In patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. b) False If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. b) False In addition to patients, all personnel and equipment must be screened before entering the MRI environment. b) False In addition to patients, all personnel and equipment must be screened before entering the MRI environment. b)		a) True
a) True b) False 37 The patient and any personnel that accompanies the patient must wear hearing protection during an MRI exam. a) True b) False 48 There are 8 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False 59 If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False 60 The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. EKG leads, pulse eximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the fisk of a bium. a) True b) False 10 If there is a fire in the MRI scan room, only an MRI-safe fire extinguisher can be used. a) True b) False 110 If there is a fire in the MRI scan room, only an MRI-safe fire extinguisher can be used. a) True b) False		b) False
b) False 7 The patient and any personnel that accompanies the patient must wear hearing protection during an MRI exam. 8 True 9 True 10 False 7 There are 6 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. 9 True 10 False 11 False 12 If a patient has had an MRI in the past 5 years, they do not require a new screening form. 13 True 15 False 16 The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. 1a True 1b) False 17 If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. 1a) True 1b) False 17 Medication patches, EKG leads, pulse eximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. 1a) True 1b) False 10 If there is a fire in the MRI scan room, only an MRI-safe fire extinguisher can be used. 1a) True 1b) False 10 If there is a fire in the MRI scan room, only an MRI-safe fire extinguisher can be used. 1a) True 1b) False	2)	Metal objects can become dangerous projectiles in the MRI scan room and could cause serious injury or even death.
The patient and any personnel that accompanies the patient must wear hearing protection during an MRI exam. a) True b) False 4) There are 6 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False 5) If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False 6) The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False 7) If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 9) The MRI magnet is always on. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		a) True
a) True b) False 47 There are 6 Safaty Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False b) False b) False ff a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False 68 The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False 79 If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 89 The MRI magnet is always on. a) True b) False 90 Medication patches, EKG leads, pulse eximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 100 If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 111 In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 112 If the patient and/or family member is unsure of an implanted device, it is ok to circle 'NO' on the screening form. a) True		b) False
b) False There are 6 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False The MRI magnet is always on. a) True b) False Medication patches, EKG leads, pulse eximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False If if there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False	3)	The patient and any personnel that accompanies the patient must wear hearing protection during an MRI exam.
There are 6 Safety Zones that restrict access to the MRI scanner to prevent possible accidents. a) True b) False If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False The MRI magnet is always on. a) True b) False Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False If the patient and/or family member is unsure of an implanted device, it is ok to circle 'NO' on the screening form. a) True		a) True
a) True b) False If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False If a patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False If the MRI magnet is always on. a) True b) False Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False In rue b) False If the patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False		b) False
b) False 51 If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False 62 The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False 73 If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 80 The MRI magnet is always on. a) True b) False 91 Medication patches, EKG leads, pulse eximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 100 If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 111 In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 112 If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True	4)	There are 6 Safety Zones that restrict access to the MRI scanner to prevent possible accidents.
If a patient has had an MRI in the past 5 years, they do not require a new screening form. a) True b) False 6) The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False 7) If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 8) The MRI magnet is always on. a) True b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		a) True
a) True b) False 6) The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False 7) If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 8) The MRI magnet is always on. a) True b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False		b) False
b) False The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. True True The patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. The MRI magnet is always on. True Tr	5)	
Fig. 1. The patient's nurse should fill out the MRI screening form by asking the patient and/or family member the questions. The patient's History & Physical should never be used to answer the questions. a) True b) False 7. If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 8. The MRI magnet is always on. a) True b) False 9. Medication patches, EKG leads, pulse eximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10. If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11. In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12. If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		
Physical should never be used to answer the questions. a) True b) False 7) If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 8) The MRI magnet is always on. a) True b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		b) False
b) False 7) If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 8) The MRI magnet is always on. a) True b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True	6)	
17) If a patient has an implanted device but does not have an information card on the device, the MRI must be performed if the ordering physician says the implanted device is ok. a) True b) False 8) The MRI magnet is always on. a) True b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		a) True
physician says the implanted device is ok. a) True b) False 8) The MRI magnet is always on. a) True b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		b) False
b) False The MRI magnet is always on. a) True b) False Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True	7)	
The MRI magnet is always on. a) True b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		a) True
a) True b) False Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False In the matching in the m		b) False
b) False 9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True	8)	The MRI magnet is always on.
9) Medication patches, EKG leads, pulse oximeter sensors, and antimicrobial clothing must be removed from the patient before an MRI to prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		a) True
prevent the risk of a burn. a) True b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment. a) True b) False 12) If the patient and/or family member is unsure of an implanted device, it is ok to circle "NO" on the screening form. a) True		b) False
b) False 10) If there is a fire in the MRI scan room, only an MR-safe fire extinguisher can be used. [a) True b) False 11) In addition to patients, all personnel and equipment must be screened before entering the MRI environment.
